July 2023 - October 2023

SKILLS

HTML5	CSS
JavaScript	PHP
MySQL	REACT
SLIM	Node.js
GIT	Express.js

HOBBIES

Photography

Watching movies

Swimming

Climbing

Full Stack Software Developer

I am a Full Stack Software Developer, with a passion to explore and discover more about the realms of both back-end and front-end technologies. I am always looking to innovate and willing to use my knowledge and skills from my diverse experiences in various industries to create solutions and solve problems. My affinity towards technology, coupled with a persistent desire to learn, fuels my journey towards a successful career in the IT industry. In my spare time, I find joy in photography, where I'm trying to capture the essence of nature, animals, and architectural wonders.

PROJECTS

I recently studied software development at iO Academy, during my time there, I developed my skills in **HTML**, **CSS**, **JavaScript** and **PHP**. Explored frameworks like **React** and **Slim**, enhancing my proficiency in building robust applications and worked in collaborative team environments following **Agile** methodologies. Below is a small selection of my favourite projects, take a look at my portfolio website for the rest.

Full Stack Project

Academy Portal

For the Academy Portal project, my task was to add a feature that allows Admins to lock specific fields, preventing students from editing them. I worked on both the front-end and back-end, interacted with the database using **MySQL**, and followed the **MVC** design pattern. To achieve this, I integrated **JavaScript** and **PHP** code into the existing legacy codebase, ensuring that the new feature followed the **MVC** design pattern, and passed **CircleCI** tests. The technologies used included **HTML**, **Bootstrap**, **JavaScript**, **PHP**, **MySQL**, **CircleCI** and **GitHub**.

React Application

Email Client

Developed a dynamic email client application using **React**. Users can compose, send, and receive emails through an API. I worked on implementing validation rules to prevent sending emails to invalid addresses. Designed a responsive front-end using **Bootstrap** framework based on supplied designs. Technologies: **React**, **HTML**, **Bootstrap**, **GitHub**.

JOB HISTORY

Ocado Retail Ltd

May 2021 - July 2023

Personal Shopper

At Ocado, I thrived in a fast-paced Dispatch department, ensuring timely loading of products into Ocado vans. Known for my professionalism and efficiency, I actively provided feedback and suggestions, contributing to smoother and more efficient operations.

Marriott Royal Hotel

October 2019 - April 2021

Conference & Banqueting Host

At Royal Marriott Hotel, I excelled in various fast paced departments, consistently delivering exceptional customer service. During my time at Marriott I strengthened my abilities to adapt swiftly to various jobs, working with different teams and providing top-tier service while maintaining professionalism.
